

RFID Card

Hotels & Resorts RFID Solutions

From Guest Experience to Hotel Operations

Flexible RFID products and customized solutions for hotel access and textile management.

- Guest Access & Experience Solution

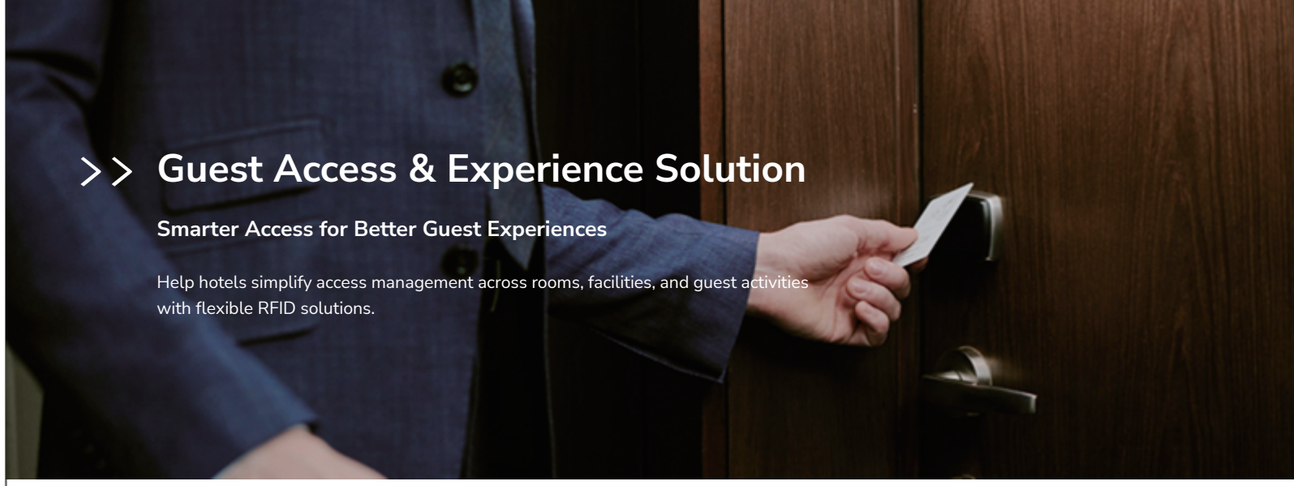

Room Access · Pools & Spas · VIP Areas · Guest Activities · Resort Facilities

Secure access · Better guest experience · Flexible facility management

- Linen Tracking & Management Solution

Towels · Bed Linen · Uniforms · Hotel Textiles

Better textile visibility · Reduced linen loss · More efficient operations

>> Guest Access & Experience Solution

Smarter Access for Better Guest Experiences

Help hotels simplify access management across rooms, facilities, and guest activities with flexible RFID solutions.

RFID Hotel Key Cards

Reliable card solutions for hotel room access and guest identification.

Materials to Match Your Brand

Choose from different materials to match your hotel brand and sustainability goals.

PVC

ColorEdge™

Wood

Paper
100% Paper-Based Antenna

BioPoly™ Stone

BioPoly™ Vinyl

Fully Customized for Your Hotel

Create hotel key cards that reflect your brand identity.

- Size & Shape
- Spot UV
- Gold/Silver Sprinkle
- Metallic Gold/Silver
- Hot Stamp

RFID Wristbands

Provide convenient and flexible wearable RFID access management for resorts, facilities, and guest activities.

Designed for Different Guest Experiences

- Pools & Spas
- Kids Clubs & Activities
- Resorts & Hotels
- VIP Areas & Events

Materials for Different Applications

Silicone
Waterproof

Elastic Cord with Fabric Card
Comfortable · Adjustable

Elastic Cord with Coconut /Wooden Cards
Flexible · Premium

RFID Key Fobs

A compact, portable, and durable RFID access Solution for hotel rooms and guest facilities.

Materials for Different Styles

ABS
Durable · Lightweight

Leather
Premium · Elegant

Wood
Natural · Sustainable

Wood with Epoxy Coating
Durable · Customizable

Flexible Customization for Your Hotel

Match your brand and application requirements.

- Color
- Shape & Size
- Up to 3-Color Printing
- UV Printing Number
- Laser Engraving Number
- Silkscreen Printing

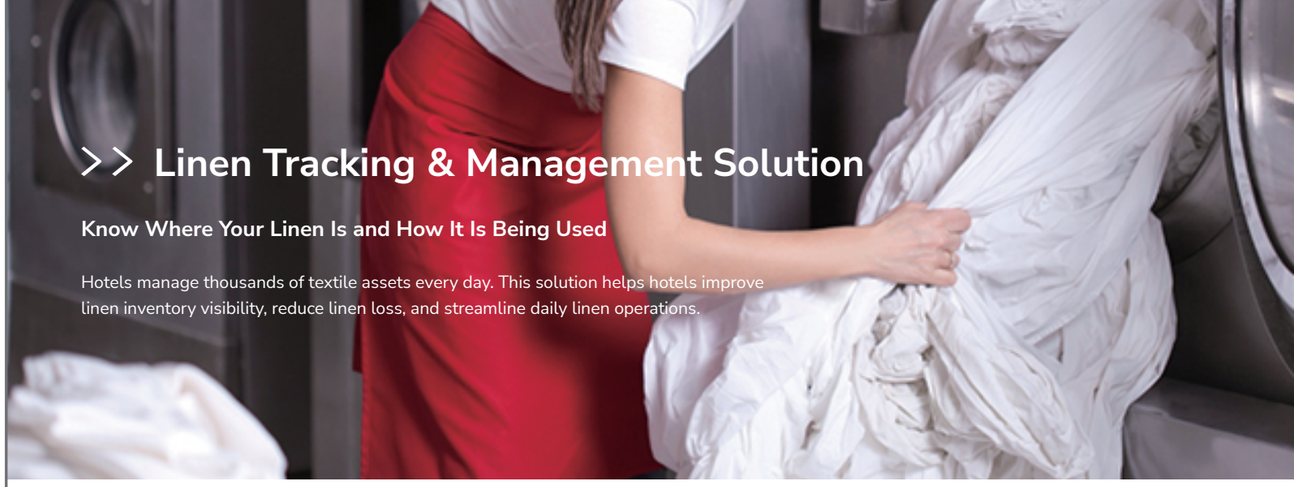

Available RFID Chip Options for Hotel Access

Our RFID hotel key cards, wristbands, and key fobs can be configured with a range of RFID chips to support different hotel access systems and security requirements.

Note: Other HF, NFC, and LF RFID chips are also available upon request.

- NXP MIFARE Classic® EV1 1K
- NXP MIFARE Classic®EV1 4K
- MIFARE Ultralight® C
- MIFARE Ultralight® AES
- MIFARE Ultralight® EV1
- MIFARE® DESFire® EV3

Linen Tracking & Management Solution

Know Where Your Linen Is and How It Is Being Used

Hotels manage thousands of textile assets every day. This solution helps hotels improve linen inventory visibility, reduce linen loss, and streamline daily linen operations.

Our Solution Components

A purpose-built RFID solution for tracking hotel linens from laundry to inventory.

RFID Laundry Tags

Silicone

Textile

PPS

Designed for 200+ industrial wash cycles and high temperatures, these laundry tags provide reliable textile identification and tracking.

RFID Readers

Handheld

Desktop

Fixed

Flexible reader options for efficient textile data collection during inventory and laundry processes.

TrakOn™ RFID Asset Tracking System

TrakOn™ centralizes linen data for inventory management, usage tracking, and textile movement.

Information You Can Track

- **Asset identity**
  Linen type, item number, department, or property
- **Inventory status**
  In stock, in use, sent to laundry, or missing
- **Location or event**
  Hotel, laundry facility, receiving area, or dispatch point
- **Usage history**
  Issue, return, transfer, and replacement records
- **Laundry history**
  Recorded laundry events and accumulated cycles

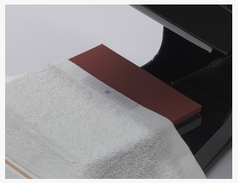

How It Works：From Linen to Data

A Simple RFID Workflow for Smarter Linen Management.

1 Tag Textile Assets

RFID Laundry Tags are attached to hotel textiles, Each textile receives a unique digital identity for tracking.

- Heat Press
- Stitch
- Embedded into fabrics

2 Automatically Capture Textile Data

RFID readers automatically identify textile assets and capture data during daily operations.

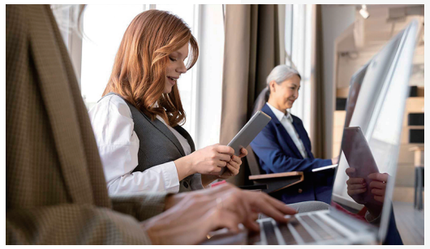

- Inventory Checking
- Laundry Operations
- Textile Tracking
- Unauthorized Removal Alerts

3 Manage & Analyze Linen Data

TrakOn™ RFID Asset Tracking System receives textile data from readers and provides digital visibility.

- Inventory Status
- Usage Records
- Laundry Cycles

4 Make Smarter Decisions

Hotel managers can use accurate linen data to reduce loss, improve inventory control, and make better operational decisions.

Smart RFID Solutions Built for Hospitality

Custom OEM/ODM · Flexible Production · Reliable Quality

From guest access to linen management, we provide customized RFID products and application solutions designed for modern hotels and resorts.

With 10+ years of RFID manufacturing experience, we support hospitality businesses with hotel key cards, RFID wristbands, key fobs, and RFID-enabled linen tracking solutions — combining reliable hardware with smart textile management capabilities.

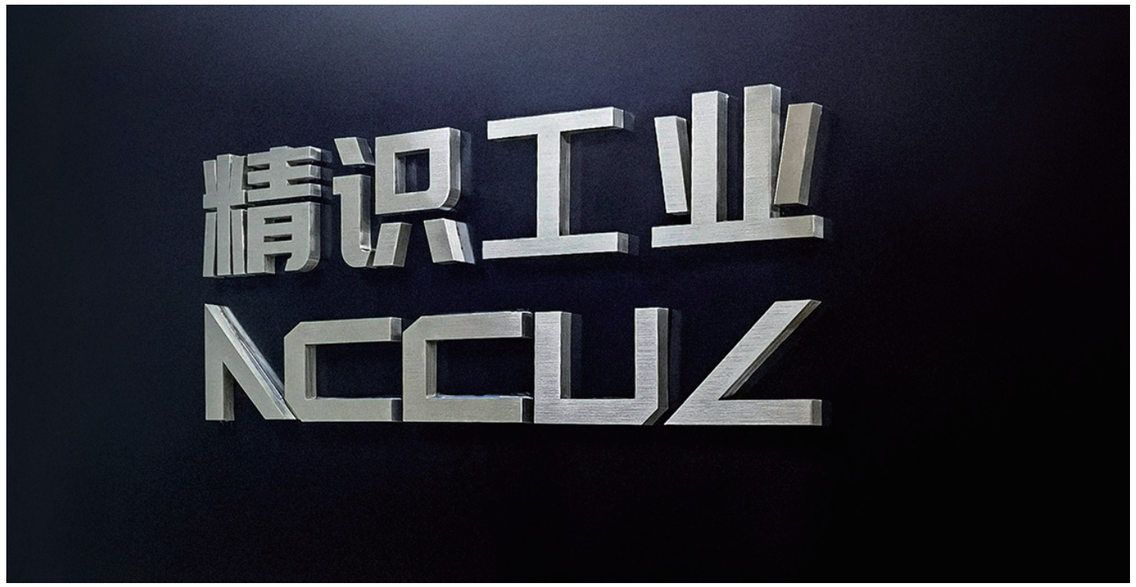

Discuss Your Hospitality RFID Project

Tell us your application and requirements.
Our team will recommend the right RFID solution for your hotel.
